## RESTRICTION INTO GROUPS

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-26, 41-46, and 48-57, drawn to methods of inhibiting growth of a bacterium, alleviating symptoms of a bacterial infection, altering a pathway of fatty acid synthesis in a bacterium, or determining whether a bacterium is sensitive as set forth in independent claims 1, 13, 41, and 48 wherein a compound having a 6-membered carbon containing ring is connected by an oxygen atom to (A)Q or (CR6R7)N, classified in class 532, subclass 1+.
  - II. Claim 47, drawn to a method of inhibiting growth of a bacterium using any enoyl reductase inhibitor, classified in class 252, subclass 380+.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case, the different inventions do not require the same compounds to inhibit the growth of a bacterium. For example, Group I is directed to specific compounds used to ascertain properties of a bacterium while Group II is directed to any enoyl reductase inhibitor.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

### ELECTION OF SPECIES

4. Claims 1-26 and 42-57 are generic to a plurality of disclosed patentably distinct species comprising an reductase inhibitor. It should be noted that the reductase inhibitor may have the formulae as set forth in independent claims 1, 13, 41, and 48 or be any reductase inhibitor that is encompassed by claim 47. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for search purposes, even though this requirement is traversed.

**Note:** *The Examiner respectfully requests that the Applicant assign each variable the appropriate value when electing a species (i.e., X = hydrogen; Z = nitrogen; Y = -CH<sub>3</sub>; etc.) and state which claims are drawn to the elected species.*

5. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

6. Due to the complexity of the restriction requirement a telephone call was not made to request an oral election to the above restriction requirement.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to D. L. Jones whose telephone number is (571) 272-0617. The examiner can normally be reached on Mon.-Fri., 6:45 a.m. - 3:15 p.m..
